

LA GARD

PRODUCT BULLETIN

PRODUCT: KEY LOCK MODEL 2200
SERIES REPLACEMENT
BULLETIN: #LG04
DATE: 10/01/2008

Prior to the purchase of LA GARD by the Kaba Group, a replacement for the 2200 Series key lock was developed. The 2270 Series was designed to streamline the installation process utilizing through-case mounting. Although the 2270 Series has been sold and in-service since 2004 a formal obsolescence initiative for the 2200 Series was never implemented.

The 2200 Series has reached its end-of-life due to serviceability of several tools required in its production. Therefore, Kaba Mas has decided to discontinue this lock series.

The 2270 Series is a direct replacement for the 2200 Series except for the "BJ" (solenoid) and "H" (switch) options. These options will not be available in the 2270 series.

Qualifying orders for the 2200 Series will be accepted through January 31, 2009. Please contact your sales representative for a copy of the lock replacement matrix.
